## Product Description

Chromebooks have a web-based management console that makes it easy for you to deploy and centrally manage a fleet of Chrome devices and users.

With just a few clicks, the management console allows you to:

### **Create user groups**

Apply policies, apps, and settings to different sets of users. Group students by grade level or subject. Separate students and faculty.

### **Pre-install and block apps**

Blacklist (block), whitelist, or pre-install apps, extensions and websites.

### **Track assets**

Assign devices to specific students and faculty and get configuration and usage reports.

### Manage user access

Control who uses your Chrome devices: prevent outside users from logging in, disable Guest Mode, or designate specific types of users (like teachers) who can sign in to a device.

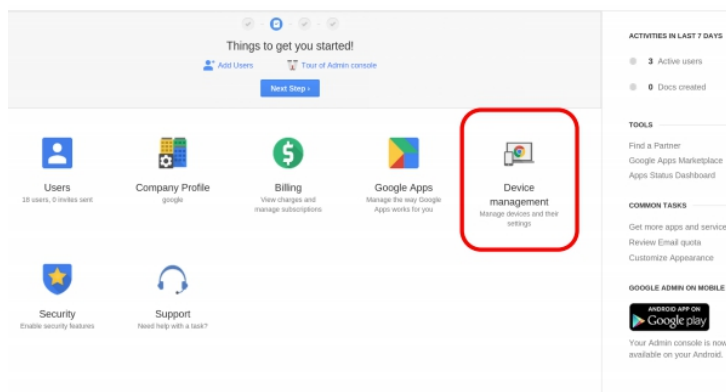

### Control network access

Define network and proxy settings to make it easy for students to get up and running and ensure they're protected by web filters and firewalls.

### Customize user features

Modify student settings like bookmark and app sync across computers, and show some school spirit on your devices with custom Chrome desktop themes.

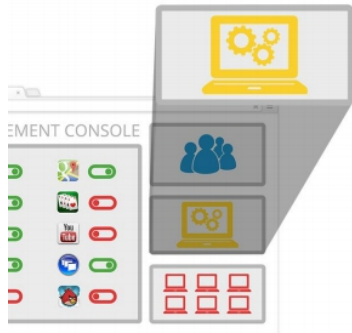

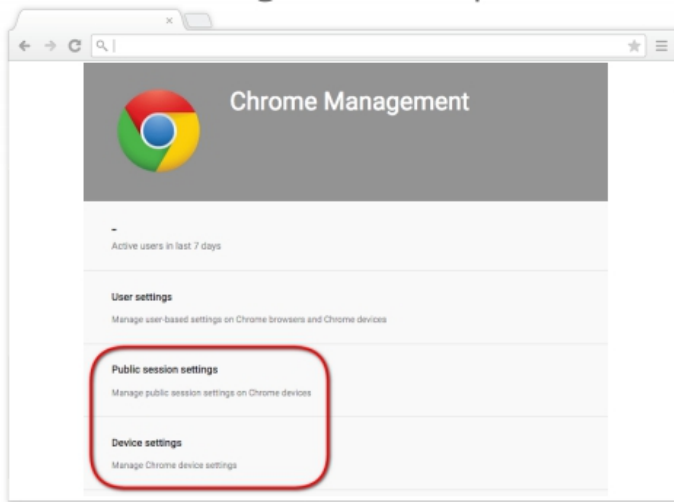

## Product Gallery

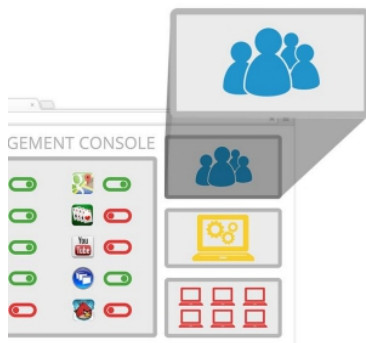

## MANAGE APPS

- Pre-install apps
- Block apps & extensions
- Create private app collections
- Set homepage & tabs
